

# WHAT CAN YOU SEE THIS SPRING ON THE WOODLAND TRAILS?

Common frog

Blue tit

Hawthorn

Take time to look into the ponds, how many different plants and animals can you spot from the bank?

How many flying animals can you spot, are they all found in the same part of the woods?

Common violet

Cuckoo

Bluebell

Brimstone butterfly

Red-headed cardinal beetle

Lords-and-ladies

Stop a few times as you walk and try to imagine what that spot would look like six months from now.

KEY See Hear Smell Touch (handle with care)

Please do not pick or eat anything you find in the woodland, instead share your photos: @scienceoxford
