

# WHAT CAN YOU SEE THIS SPRING ON THE WOODLAND TRAILS?

Common frog

Blue tit

Hawthorn

Take time to look into the ponds, how many different plants and animals can you spot from the bank?

How many flying animals can you spot, are they all found in the same part of the woods?

Common violet

Cuckoo

Bluebell

Brimstone butterfly

Red-headed cardinal beetle

Lords-and-ladies

Stop a few times as you walk and try to imagine what that spot would look like six months from now.

## SCIENCE OXFORD CENTRE WOODLAND WALKS

KEY  See  Hear  Smell  Touch (handle with care)

Please do not pick or eat anything you find in the woodland, instead share your photos:    @scienceoxford

# EXPLORE THE WOODLAND

The Science Oxford Centre wildspace comprises 15 acres of woodland, ponds and meadows. There are three marked trails to follow, giving you the opportunity to explore diverse habitats and the changing seasons. The routes vary in length and are marked in different colours so you can easily find your way. Enjoy our wonderful woodland but please keep to the marked paths and tread carefully.

## Woodland trails

1km; 20-40 mins

750m; 15-30 mins

400m; 10-20 mins

## DISCOVER THE SCIENCE OXFORD CENTRE

The Science Oxford Centre is a unique experience for primary-age children and families where all you need to get started is a little curiosity...

Our hands-on exhibits in the Exploration Zone and woodland trails give children the freedom to explore and experiment, engage with science and have fun. Families can visit on our Family Days, as well as special holiday events and Clubs in our classroom space. Check out what's coming up and book online: [scienceoxford.com/events](http://scienceoxford.com/events)

### KEY

- Main entrance
- Café/viewing deck
- Science Oxford Centre
- Theatre
- Water Lab
- Ponds
- Amphitheatre
- Woodland exit
- Bicycle parking
- Wood Centre for Innovation
- Café
- Toilets (disabled and baby change facilities by the café)

There is only wheelchair access to the viewing deck. Beyond this, other paths have steps and steep areas which might make access challenging.
